AIMS AND SCOPE

Journal of Science and Technology in Civil Engineering (STCE Journal) is a specialized scientific journal in the field of construction, which has annually been published with three issues in English under p-ISSN 1859-2996 and e-ISSN 2734-9268. The Journal has been established in 2007. The STCE Journal provides a forum for announcing and introducing new researches and application results in the field of construction which have not been previously published or under review elsewhere. The scope of the journal includes the following areas: building and industrial engineering; bridge and road engineering; coastal, offshore and hydraulic engineering; materials; mechanical engineering; environmental engineering; project management and computer science. The STCE Journal has been recognized as a prestigious national journal by National Science and Technology Development (NAFOSTED) - Ministry of Science and Technology since August 2019 and then accepted in the ASEAN Citation Index (ACI) system since April 30, 2020. All manuscripts submitted to the Journal are subjected to a double-blind peer review process by at least two qualified researchers or leading experts in Vietnam and abroad. The process of manuscript submission, peer-review and publication is conducted via the online system at <http://stce.nuce.edu.vn/index.php/en>.
