

## Table of Contents

|                                                                                                                                                                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 1. Shear resistance determination of concrete dowel in shallow concrete-steel composite floor-beam based on push-out tests<br><i>Han Ngoc Duc, Vu Anh Tuan, Nguyen Dinh Hoa, Nguyen Trung Kien</i> .....                                                 | 1   |
| 2. Investigate the bending and free vibration responses of multi-directional functionally graded plates with variable thickness based on isogeometric analysis<br><i>Son Thai, Qui X. Lieu</i> .....                                                     | 10  |
| 3. Prediction of reinforced fly ash concrete columns' behavior under eccentric loads using Gaussian process regression<br><i>Dang Viet Hung, Sykampha Vongchith, Nguyen Truong Thang</i> .....                                                           | 30  |
| 4. A numerical solution for seismic response prediction of bridge piers with high damping rubber bearings<br><i>Nguyen Anh Dung</i> .....                                                                                                                | 44  |
| 5. Analyze development potential in affected areas adjacent to urban public transit systems. Case study in the stations of Kim Ma and Van Phuc 2 (BRT Line No.1)<br><i>Nguyen Thi Thanh Mai, Nguyen Thi Mai Chi, Ngo Duy Hung, Dang Ngoc Khanh</i> ..... | 58  |
| 6. Blast testing of ultra-high performance concrete fortifications using local materials<br><i>Pham Manh Hao, Nguyen Cong Thang, Nguyen Van Thao, Nguyen Van Tuan, Luong Nhu Hai, Ngo Ngoc Thuy, Nguyen Xuan Man</i> .....                               | 73  |
| 7. A numerical analysis on bending capacity of steel pipe columns using a mechanical joint with concrete-filled steel tube<br><i>Nguyen Canh Tuan, Nguyen Thai Khiem</i> .....                                                                           | 87  |
| 8. Blockchain crowdsourced arbitration in construction project delay resolution<br><i>Pham Vu Hong Son, Pham Ngoc Lien</i> .....                                                                                                                         | 100 |
| 9. Vietnam general contractors' perceptions on challenges to the delivery of green building projects<br><i>Tran Quang Dung, Nguyen Huu Truong, Nguyen Tu Hieu, Nguyen Manh Hung, Sajjad Nazir</i> .....                                                  | 116 |
| 10. The variation of temperature in parked car's cabin in the summer<br><i>Pham Van Toi, Tran Ngoc Quang, Nguyen Van Duy, Mac Van Dat</i> .....                                                                                                          | 129 |
