

Table of Contents

1. Determination of influence lines for structural responses with uncertainties in properties of the structure <i>Thanh Xuan Nguyen, Anh Tay Nguyen</i>	1
2. Effect of temperature on electrical resistivity of high-performance fiber-reinforced concretes <i>Phan Tan Duy, Le Ba Khanh, Nguyen Duy Liem, Nguyen Van Thuan</i>	21
3. Sustainable utilization of mixed healthcare waste as aggregate in lightweight concrete mixes: mechanical behavior, water absorption and leaching studies <i>Lubna K. Hamada, Zainab Z. Ismail, Anita Závodská</i>	33
4. Experimental study on the effectiveness of strengthening reinforced concrete slab-column connections using CFRP sheets <i>Pham Xuan Dat, Nguyen Trung Hieu</i>	46
5. Structural behavior of UHPC epoxy composite plate subjected to velocity impact loading <i>Mai Viet Chinh, Nguyen Van Tu, Nguyen Quang Nam</i>	55
6. Investigating compressive strength of concrete containing steel fiber by data-driven approach <i>Tran Van Quan, Nguyen Ngoc Linh, Nguyen Ngoc Tan</i>	65
7. Assessing the social costs of mixed transport systems with a dominance of motorcycles <i>Tam Vu, John Preston</i>	80
8. An innovative model to estimate the tension field inclination considering crack growth for steel plate shear wall <i>Chung Nguyen Van, Ali Ghamari</i>	102
9. An analytical approach to predict post-cracking behavior of steel fiber reinforced concrete considering the fibers orientation <i>Vu Chi Cong, Vu Duc Tam</i>	114
10. Dynamic finite element modeling of axially functionally graded timoshenko microbeams under a moving mass <i>Vu Thi An Ninh, Nguyen Thi Kim Khue</i>	128
11. Upper bound limit analysis of slope in cohesive-frictional soils using the node-based smoothed finite element method <i>Thien Vo-Minh</i>	140
12. Corrosion effect on stress concentration factor in tubular T-joints under axial loading <i>Vu Dan Chinh, Do Thanh Long</i>	154
