

Table of Contents

1. Experimental study on the effectiveness of strengthening of reinforced concrete beams with opening in shear span using CFRP sheets <i>Nguyen Trung Hieu, Pham Xuan Dat</i>	1
2. Effect of fiber content on flexural fracture parameters of high-performance steel fiber-reinforced concrete <i>Thi-Ngoc-Han Vuong, Duy-Liem Nguyen, H. T. Tai Nguyen, Tri N. M. Nguyen</i>	12
3. Numerical investigation of shear behavior of steel fiber reinforced concrete beams without stirrups subjected to an asymmetric point load <i>Vu Chi Cong, Chu Tien Dung, Du Duc Hieu, Vu Duc Tam, Nguyen Ngoc Tan</i>	24
4. Static and dynamic behaviour of sandwich beams with porous core: Experiment and moving least squares mesh-free analysis <i>Tran Quang Hung, Do Minh Duc, Tran Minh Tu, Le Xuan Dung, Chau Ngoc Bao</i>	39
5. Influence of recycled steel fiber on the properties of self-compacting concrete with high fly ash content <i>Nguyen Hung Cuong</i>	55
6. Understanding the correlates of construction safety of high-rise buildings: A Bayesian perspective <i>Nguyen Anh Duc</i>	68
7. Modeling of organizational behavior framework for road usage charge management <i>Nguyen Luong Hai</i>	82
8. Assessment of waste management scenarios toward marine plastic debris mitigation and cost reduction <i>Nguyen Linh Hoa, Ta Huong Giang, Song Toan Pham Phu, Hoang Minh Giang</i>	93
9. Critical review of capacitive deionization: Design, operation consideration and real-world environmental applications <i>Dinh Viet Cuong</i>	108
10. Utilizing numerical simulation to determine the reasonable parameters for the design of hydraulic rock-splitting head <i>Truong Giang Duong, Ngoc Hai Nguyen</i>	130
11. Energy evolution of gravitational-granular flows <i>Quach Viet Anh, Nguyen Duc Manh, Le Van Thao, Vo Thanh Trung</i>	143
12. A comparative study of two correlation functions applying to the quantitative characterization of the pore structure within hardened concrete <i>Vu Chi Cong</i>	153
