

Table of Contents

1. Verification of large-diameter bored pile performance using full-scale static loading tests: A case study of the Anhsin bridge foundation of the Taipei MRT <i>Tai-Yi Liu, Cheng-An Lee, Chao-Pang Wang, Shih-Ping Ho, Hong-Kee Tzou</i>	1
2. Seismic strengthening of RC bridge piers with high-performance cementitious jacketing: A comprehensive review, recommendations and a precast HPC-FRP grid jacket proposal <i>Doan Cong Chanh, Phan Hoang Nam, Hoang Phuong Hoa, Gianluca Quinci, Fabrizio Paolacci</i> ..	10
3. Dual effect of fly ash on the corrosion resistance of lateral reinforcement and the stress-strain curve of confined concrete <i>Dung Xuan Le, Chinh Van Nguyen, Paul Lambert, Quang Hieu Bui, Tinh Phuoc Le, Loc Van Truong, Hiep Van Nguyen, Phuong Viet Vu</i>	30
4. Study on treatment of human waste using co-composting with agricultural waste toward to resource recovery <i>Do Hong Anh, Nguyen Viet Anh</i>	47
5. Mechanical and thermal buckling analysis of functionally graded sandwich beams with foam core using different beam theories <i>Duc-Kien Thai, Van-Long Nguyen, Minh-Duc Do, Thanh-Binh Chu</i>	59
6. A Ritz solution for comprehensive analysis of functionally graded beams with various boundary conditions <i>Ngoc-Duong Nguyen</i>	80
7. AI-based estimation of vehicle dwell time at signalized intersections in motorcycle-dominated mixed traffic environment: A case study in Hanoi <i>Tam Vu, Ngoc Viet Pham</i>	100
8. Axial performance of UHPC-filled steel tube composite columns <i>Hoang Hieu Nghia, Mai Viet Chinh</i>	113
